

Printing DCADMap

Print: The 'Print' tab will print what is in the Display Area. There are two options for printing. The **Paper Size** and **Page Orientation**. The paper is either, Letter 8.5 x 11, or Tabloid 11 x 17. The page orientation options are Portrait or Landscape.

After the paper size and page orientation have been selected, click on 'Create Print Page'. This will open a new browser window with the map image that is displayed in the display area. Also a **Title Block** will appear with a **North Arrow**, **Scale Bar**, **Disclaimer**, **DCAD Name** and **DCAD Logo**.

A screenshot of the DCADMap print settings dialog box. At the top are tabs for 'Layers', 'Legend', 'Print', and 'Find'. The 'Print' tab is active. The dialog contains the following elements:

- A label 'Select the page size' followed by a dropdown menu with three options: 'Letter 8.5 * 11', 'Letter 8.5 * 11' (highlighted), and 'Tabloid 11 * 17'.
- A label 'Select the orientation of page' followed by two radio buttons: 'Portrait' (selected) and 'Landscape'.
- A 'Create Print Page' button at the bottom.
- Below the button, a text instruction: 'Click on "Create Print Page" to open a new Browser window with the Map Image, You can then use the File/Print menu item to send the display to your printer.'

To print this image on your printer, click the mouse on the Page Set Up tab in your internet browser's Print icon. **Make sure the paper size and page orientation are the same as were selected on the 'Print' tab.** Then select Print.

NOTE: You will not have to set the Page Setup every time you print. Only when you change the paper size or page orientation.
